TOMA offers great strength and durability for windows; It is the strongest viable material, cheap to buy, and also fully recyclable. It gives your building a sleek, modern look that will last for up to 30 years before it needs to be replaced. Furthermore, you can order the aluminium frames in almost any colour and size, which gives you greater flexibility when it comes to the look of your building. With all these benefits, it is clear to us why we chose to form our business around it! We offer a wide range of aluminum windows for both homes and commerce. Contemporary styles for modern buildsing are available with U-values as low as 0.71W/m²K. Additionally, we can supply you with replacement windows for listed buildings in accordance with planning restraints. Our frames come with the option of thermal breaks and we also offer double and secondary glazing.
